

Actually I am someone

PHOTO EXHIBITION

By Tarek Halaby & Aurélia Berthe

Technical rider (V1.0)

General info

Time for setup	3 hours
House technicians for setup	2

Exhibition space

We do not have special requirements for the space, but please send or mail us some photo's of the space, so we can take a look beforehand.

The photographs need to be hung on the walls of the space.

There are 2 large photo's (about 1m wide and 1,5m high) and 10 smaller ones (about 35cm wide and 50cm high)

The rest of the photo's needs to be projected, either on a screen, or on a white wall. (we prefer a white wall though)

Lights

Some small spotlights to light the photo's

Rest of the space should not be too light, because you won't be able to see the projected images anymore if there is too much ambient light.

Sound

No sound required

Video

1 video projector of about 4000 ANSI-lumen (with a composite video input)

1 brace to hang the projector

1 DVD player that can play self burned DVD's

all the necessary cables
